Sentinel™ Setting Device • \$5999

Designed by: Shauna Davis & Engineered by: Jose Feliciano

The Equalizer® Sentinel™ is a revolutionary new product designed from the ground up to address the modern technician's frustration with the setting tools available on the market today. The Sentinel™ enables one technician the ability to remove and replace windshields, back glasses, bus or coach glass effortlessly and in the fastest, safest and most efficient way possible, all without ever needing to manually pump a vacuum cup.

The Equalizer® Sentinel™ setting device is a mobile or in shop one-man setting device which features AC or DC power that works using hydraulic power. You can move in/out, up/down, and adjust angles to get the right position in lifting or setting glass. The Sentinel™ is a powerful addition to Equalizer's fleet of AIRFORCE™ Technology products. Using two 10 inch vacuum cups with two PowerPumps™, this revolutionary setting device has a maximum safe working load of 175 lbs. (79 kg). The base expander acts as a counterbalance for heavier and larger auto glass. Sentinel™ is crafted using high-performance steel. Made in the USA.

THE EASIEST ONE-PERSON AUTO GLASS SETTING DEVICE EVER MADE

PryBaby™ • \$18

This set contains 5 flexible, specially shaped plastic tools designed to prevent damage to the vehicle.

From left to right: This tool features a 45° angle on one end and a 90° angle on the other which is useful for prying small items. This tool has a 110° bend for removing door panels. The widest tool has a straight chisel end and a 90° curved end for removing snap-off mouldings and cowlings. Similar to an installation stick, this tool also features a notched end for removing clips. For all prying needs, this tool is designed with an 85° angle on one end and a 30° angle on the other.

PDT443

PryDaddy™ • \$60

This set contains 5 of the same type of tools included in the GBM446 above as well as 6 additional pry tools and 1 hammer. Comes in a roll up tool pouch.

CRT250

Clip Removal Tools Set of 5 • \$53

These tools are made with different size openings that will grab and hold the clip and different lengths. Made of the highest quality, heat-treated stainless steel.

CTD607

Recessed Clip Removal Tool • \$12

Easily fits down into recessed areas and then can be slid under the head of the cowling clip.

CCR819

Expansion Clip Removal Tool • \$36

Features a small sharp screw that bites into the plastic head of the clip and pulls the center pin out. The clip will then collapse and can be easily removed.

TPE657

Clip Removal Tool • \$12

Our Clip Removal Tool has a V-groove with sharpened tips so it will slip under the head of the clip. Works on many cowlings and drip gaskets.

MR747

Moulding Clip Release Tool • \$9

This tool is designed to release the clip from the body of the vehicle in order to remove the moulding. Made of high-carbon steel. Works well with older model vehicles.

IW1214

Double-Direction Clip Release Tool • \$7

An industry standard for over 50 years, this tool was designed to release the clip from the body of the vehicle in order to remove the moulding. Made of hardened steel.

HRT367

Hose Removal Pliers • \$13

Designed to save the hose that runs to the windshield washer nozzle by pushing it off quickly and without damage.

DCR244

Door Panel Clip Removal Tool • \$11

Features a slim design to easily slide under door panel clips on older style vehicles.

CT749

C-Clip Removal Tool • \$8

This tool works on most common C-clips on manual window regulator handles. Features flared sides to prevent the metal from damaging the door panel and a unique back-end which firmly holds the clip. Made in the USA.

TRL350

Door Panel Clip Removal Tool • \$12

Features tapered, thin edges to easily slide between the door and panel to remove clips without damage. Designed with two grooves to access the clips from different angles.

JCS452

Compact C-Clip Removal Tool • \$8

This compact tool has a flat design that will let you use it from all sides. Works on most common C-clips on manual window regulator handles.

SNS675

Slip-N-Slide™ • \$31

Invented By: Duane Roser
 Tab retractor tool for door glass removal. Made of heavy-duty, flexible plastic that can be bowed in either direction to accommodate all types of removals. *Some vehicles may require the use of 2 tools at once for release of multiple fixtures simultaneously.

For use on select 2009 and up: Dodge, GM, Chrysler, Ford and Jeep

DEC381

Double-End Moulding Release Tool • \$7

This tool has a small rubber spacer through each end to hold the tool up off of the glass about 1/32". This prevents the tool from scratching the glass and holds the end above the glass to lower the chance that the tip will break the glass. Made of steel.

RFM683

Christmas Tree Moulding Remover • \$16

This tool is thin enough to fit under mouldings and wide enough as to not tear them. The long curve allows for leverage to pry against the glass. The wide shank is coated with soft plastic so it absorbs shock and is less likely to break the glass. Made in the USA.

BMR1488

Belt Moulding Remover \$21

Designed to both remove and save belt mouldings that were installed with clips that are slid down from the top and clamp into the metal.

RHR584

Rivet Head Removal Drill Bit • \$75

Removes the rivet head and leaves the steel stem in place. This allows you to push the remaining aluminum shank and the rivet stem out to release the rivet. Made of hardened steel in the USA.

DPO585

Rivet Stem Remover • \$36

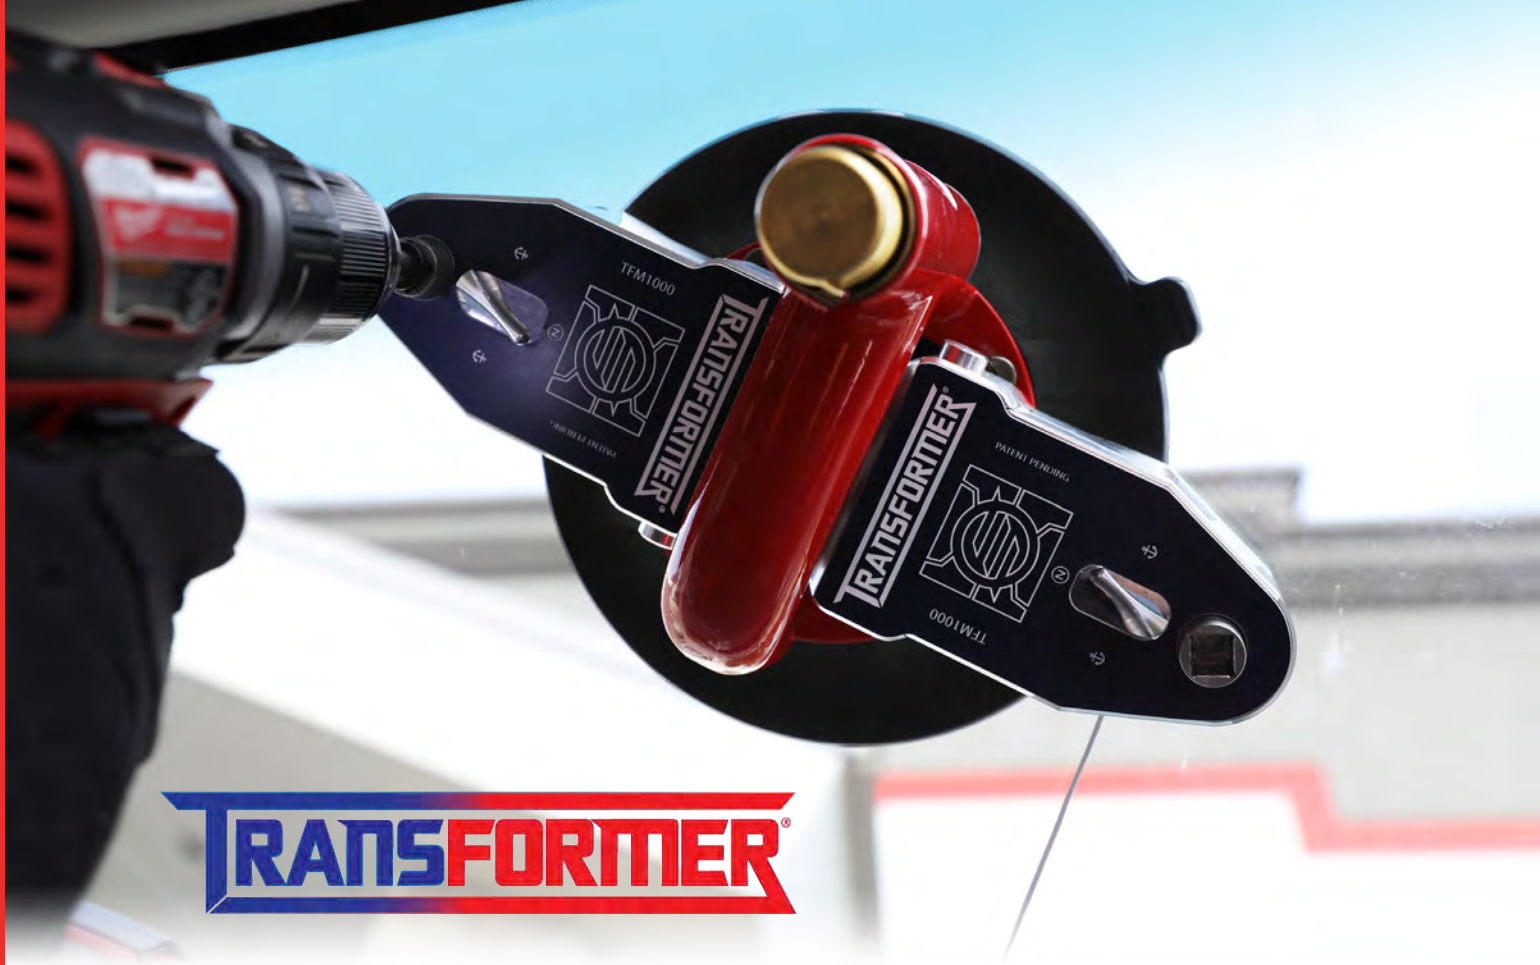

Invented by: David LaPoint
This tool has a contoured end so it will sit over the rivet and align perfectly with the rivet stem. With several light taps of a hammer the rivet stem is driven out.

AEP1132

EasyPunch™ • \$30

Designed to remove rivet stems with a built-in spring loaded punch which is delivered with a simple push of the handle. Eliminates the need for hammering. Not for use on steel rivets.

EHB186 • 3" W x 10" L

EHL187 • 3" W x 12" L

EHE160 • 3" W x 14" L

Express™ HydroBlades™ are designed with dimples stamped on the side of the blade that rides against the urethane for carrying cutting lubricant into the urethane.

Bullet™ Blade

\$42

REL261 • 1-1/2" W x 12" L

REB262 • 3" W x 10" L

REL263 • 3" W x 12" L

REE264 • 3" W x 14" L

Bullet™ Blades are elongated, rounded blades designed to cut from all angles. Their unique shape and sharpening make side-to-side cutting easier and make slicing through wide beads of urethane a breeze.

Express™ Blade

\$42

BFE1401 • 1-1/2" W x 10" L

LBE1403 • 1-1/2" W x 12" L

BFE1400 • 3" W x 10" L

LBE1402 • 3" W x 12" L

RLE1404 • 3" W x 14" L

The Equalizer® Express™ Blades are designed to cut through wide beads of urethane using a flexible material that puts less stress on the glass.

Piranha™ Blade

\$48

PHB169 • 3" W x 10" L

PHB174 • 3" W x 12" L

PHB175 • 3" W x 14" L

The Equalizer® Piranha™ blade uses the same cutting technology as the original HydroBlade™ but also incorporates serration on a portion of each side of the blade, making cutting from left to right and right to left much easier.

EHF173

Express™ Specialty Blade
\$42

Designed to cut around very radical curves in the glass and in vehicles that have corners with a sharper-than-90° angle.

ES1406

Express™ Sheath • \$30

The sheath encloses the blade shaft on Equalizer® power tools to provide protection and allows them to use a flexible blade by giving it added support.

Designed to cut along flush-mounted or encapsulated urethane set auto glass. Easily converts to an air-powered cold knife.

Talon™ Oscillating Blades

These high-quality blades are made of flexible stainless steel, so they will flex before they break. This ability acts as a warning. When you see the blade start to flex, you know it is time to back-off and decrease the amount of pressure. The blades are flat on one side so they will ride against the glass and cut the urethane at the point of least resistance. These blades will fit the Falcon™, Raven™, and TimeSaver™ tools as well as most oscillating tools on the market. These blades will not fit the Ninja™ line of tools.

EXT-DELTA-XL • 7¾" Blade • \$33

EXT-DELTA-XXL • 9" Blade • \$37

EXT-DELTA-XXXL • 10" Blade • \$40

Extractor™ blades are made from stainless steel, and have been cut and tapered to custom specifications. The blades offer excellent flexibility and strength. If used correctly, they should last 200 cut-outs or more. Many users report 300 - 400 cut-outs. For best results it is necessary to keep the blade sharp and use adequate water for lubrication. The blades are very easy to sharpen. Simply run across a wet belt sander, grinder or file, putting a 45 degree edge on one side of the blade, in the same manner as you would sharpen a chisel.

Milwaukee® M18™ Cordless Urethane Gun

Milwaukee® Urethane Guns deliver urethane with a powerful pushing force of 950 pounds and dispense the highest viscosity materials with ease. The combination of a variable speed dial and trigger switch along with the Constant Flow Technology, provides a steady material flow rate and even urethane beads. The auto-reverse feature prevents unwanted dispensing of materials. An interchangeable front-end allows this unit to be used with 10 oz. (300ml), 20 oz. (600ml) or quart size (32 oz./946 ml) sausage packs (conversion kits sold separately). For the 465ml urethane packs, you can use the 600ml barrel by pushing the plunger up to accommodate the pack.

Gold Glass Group Mouldings

Designed to not shrink or discolor over time, never crimp around corners, always lay flush against the vehicle, never need a heat gun to install, and fit both thick windshields and thin tempered parts. A layer of butyl is embedded into the channel of each moulding and adheres to the vehicle while the urethane cures. This adhesive ensures a perfect bond and the cured urethane holds it permanently in place.

Sentinel™ Setting Device • \$5999

Designed by: Shauna Davis & Engineered by: Jose Feliciano

The Equalizer® Sentinel™ is a revolutionary new product designed from the ground up to address the modern technician's frustration with the setting tools available on the market today. The Sentinel™ enables one technician the ability to remove and replace windshields, back glasses, bus or coach glass effortlessly and in the fastest, safest and most efficient way possible, all without ever needing to manually pump a vacuum cup.

The Equalizer® Sentinel™ setting device is a mobile or in shop one-man setting device which features AC or DC power that works using hydraulic power. You can move in/out, up/down, and adjust angles to get the right position in lifting or setting glass. The Sentinel™ is a powerful addition to Equalizer's fleet of AIRFORCE™ Technology products. Using two 10 inch vacuum cups with two PowerPumps™, this revolutionary setting device has a maximum safe working load of 175 lbs. (79 kg). The base expander acts as a counterbalance for heavier and larger auto glass. Sentinel™ is crafted using high-performance steel. Made in the USA.

SAFELIFT™

SL1000

SafeLift™ • \$4130

Equalizer® SafeLift™ is a powered installation system that allows a technician to remove and install windshields, panoramic roofs, backlites, and even body panels without a second technician. SafeLift™ features a remote controlled lifting operation that enables setting glass from either the left or right side of the vehicle and an innovative rotating glass stand. SafeLift™ provides technicians full mobility without heavy lifting and strain. Made of light-weight aluminum for mobile or in-shop application.

SIDEKICK™

AUTO GLASS SETTING TOOL

- Acts as the “other person” to install a windshield or backglass on your own
- No measuring or precise placement required
- Works from either side of the vehicle

Patent No.
8,572,835

JSK757

Deluxe Kit • \$494

The deluxe kit includes a double vacuum cup and two individual vacuum cups for use on the glass in addition to the Sidekick™ base and upper vacuum cups.

JSS756

Standard Kit • \$289

The standard kit comes with the Sidekick™ base and upper vacuum cups.

HST212

The Auto Glass Setting Stick • \$145

You can easily install a windshield by yourself without worrying about setting it properly with the Auto Glass Setting Stick. Measures 48" Long x 2" Wide x 3/4" Thick. Made in the USA.

EP912

Elbow Pad • \$31

Ideal for setting windshields to help prevent injury. Features an interior metal layer for distributing pressure across the vehicle's hood to prevent damage. A great addition to any setting device.

RL1382

HoodStop™ • \$115

When you set the windshield, the HoodStop™ will stop the windshield in the correct place. Close the hood, dry-set the windshield, set the stop on the windshield in the proper position, and engage the vacuum.

TJ1432

Speed Stops™ Pkg of 10 • \$12

Speed Stops™ are 1/2" long, but the nylon spacers can be quickly removed and shortened so Speed Stops™ will fit any vehicle. They are self-tapping so there is no need to drill a hole.

ULF481

Ultrasonic Leak Detector • \$130

Use as a leak preventer after glass installation. Ensure a leak-free installation by placing the transmitter into the vehicle and running the receiver around the perimeter of the installation. Powered by a 9-Volt battery (included) and packaged in a handy carrying case. It has a one-year warranty.

LJ1260

TopSTOP™ • Set of 2 • \$16

A reusable option for holding the glass in place while the urethane is curing or holding the trunk lid down while working on a back glass.

PHT318

Moulding Hold Down Tool • \$12

Designed to hold the emblem or moulding in place while the adhesive cures. Mounts with a vacuum cup and features an adjustable knob to control the amount of pressure applied. Made of high-impact plastic.

Installation Sticks

- IS742 Installation Stick • \$1
- ISC741 Chisel-End Installation Stick • \$2

The most used tool by Auto Glass Technicians. Can be used to manipulate the urethane, remove door panels, install rubber gaskets, remove mouldings, lift the cowlings, and tuck in headliners. Use the rounded tip for all the things you now use a regular installation stick for, and then turn it around and use the chisel-end to scrape excess urethane buildup out of corners where a pinchweld scraper or blade will damage the paint. They are great for removing excess wet urethane. Made in the USA.

Installation Stick Handle

- ISH691 • Handle Only • \$4
- IWH692 • Handle With Stick • \$4

A tool handle that is hollowed out in such a way that it will allow an installation stick to be slipped inside and fastened with a set screw. Replacement screws available.

LSW583

- Retaining Nut Tool
- \$8

Designed for Ford, GM and Chrysler vehicles to remove or install window retaining nuts. The slide-through handle allows you to work in confined spaces or to remove a glass that is not broken. Made of steel and plated to prevent rusting.

ASW576

- Adjustable Spanner Wrench • \$49

The unique design allows it to fit a variety of different size retaining nuts. Made of hardened steel.

Locking Strip Tool

\$19

LS758 • Standard

RU1391 • Curved Shaft

The unique design of this tool allows the tip to swivel 90° in either direction to work where others will not. The four different eyelet types will fit most rubber locking strips on the market.

LGM207

Locking Strip Tool • \$6

The narrow jaws open the rubber gasket and a small piece of metal rolled under the center part forces the locking strip into place. Works on Ford, Chevy and Mack trucks, as well as BMW and recreational vehicles. This tool is made of chrome-plated, hardened steel.

PA1348

Locking Strip Tool • \$24

Features 6 different size tips that can be changed in seconds by loosening the hex screw. The tips range in size from 3/8" all the way up to 3/4". The 3/4" tip has a 90° angle to give the proper angle on wide, flat-type locking strips.

BDA251

Footloose™ • \$80

With Footloose™, you can push out on the glass with one hand while you release the rubber gasket with the other.

RGC751

**Rubber Gasket Cleaner
\$12**

Designed with a chisel-end that is sharpened on the end and sides so it will clean glass and old sealant out of the gasket with one, easy pulling motion while keeping your hands clear of the glass.

RT752

Rope Insert Tool • \$17

This tool is designed to ease the rope under the lip and set it in the groove of the gasket. Has a 20 foot length of rope that will reach around the largest rubber gasket. Made in the USA.

PT697

Pigtail Rubber Gasket Tool
\$16

Designed to fold the self-locking rubber into the locking part of the gasket.

MQ1292

Self-Locking Rubber Gasket Tool • \$12

The curved polished steel tip of this tool will slide the locking rubber in easily.

MR1293

Ball End Self-Locking Rubber Gasket Tool • \$12

The steel ball makes it very difficult for the tool to come out of the rubber gasket lessening the chance you will scratch the paint of the vehicle you are working on.

RGL34

Self-Locking Rubber Gasket Tool • \$36

End Replacements:

RFE39 • Pigtail • \$11

RFS40 • Straight • \$10

The pigtail end of the tool is most useful when the self-locking rubber is not very old and still a little stubborn. The straight end works great when the self-locking part goes into place easily. Made of cast aluminum with steel ends.

Double Bend Rubber Hook Tool

RT753 • Short • \$12
 RTL895 • Long • \$16

Designed for pulling the rubber gasket over the pinchweld on rubber set jobs. Has a bent-then-curved end. RT753 shank measures 3-1/4". RTL895 shank measures 7-1/2". Made in the USA.

AHL818

Long Rubber Hook Tool • \$12

This tool has a longer hook section to reach over any pinchweld and grab the rubber gasket. It measures 7" from the curve to the point where it goes into the tool. The hook is 1-1/2" long from curve to tip.

MT1295

Narrow Nose Hook Tool • \$12

This tool is an 1/8" thick at the bend and tapers down to 1/16" at the tip. Made of hardened steel and chrome-plated.

HTS923

Hook & Pick Set • Set of 4 • \$12

Our Hook & Pick Set helps you pry up the smallest items. The straight pick also works great when you are trying to align small holes. Tools measure 6-1/2" Long.

LG1257

Pattern Making Pencil \$12

Use our Pattern Making Pencil to make a pattern when a glass is missing in a piece of heavy equipment. Most rubber gaskets have a 5/16" space between the rubber and the pinchweld. This pencil has a plastic ring that spaces the pencil exactly 5/16" inside the pinchweld and makes a perfect pattern. Made of aluminum with a collet holder that keeps the pencil in place.

LY1275

Radius Patterns Set of 9 • \$47

Use these patterns to determine the radius, then measure the size of the opening. Radius Patterns have 9 circles starting at 1" and increasing in 1/4" increments up to 3".

6" Radius Pattern
Sold Separately

LY1275-6
